The Ohio State Department of Otolaryngology is currently enrolling healthy individuals. This is a noninvasive research study evaluating complaints of chronic nasal obstruction as well as smell loss.

The study requires about 2-3 hours of your time, during which you will undergo odor and irritation detection tests, a CT scan, and measurements of nasal airflow and volume. A total of 3 visits may be required. You will be compensated for your time. For each visit, the compensation may range from $20 to $75, which will be mailed to you after the visit.
