

PROTECT YOUR BUSINESS DURING COVID-19

by working with Ohio State experts

With a pandemic gripping the nation, today's business leaders are facing challenges unlike any this country has seen.

The moments ahead are crucial. The way companies respond to the formidable challenges of COVID-19 will be key to the success and longevity of their operations.

We are a trusted source for science-backed knowledge and guidance on COVID-19.

Resources and Expertise

As an academic health center on the front lines of managing the COVID-19 pandemic, The Ohio State University Wexner Medical Center has discovered proven ways to limit the spread of the virus and protect our own employees and patients. With our depth of expertise in medicine, infectious diseases and patient safety, as well as our extensive experience in sanitation and building maintenance and design, we've developed science-based strategies and safety protocols we're sharing with businesses like yours through downloadable guides, recurring webinars and individual consultation services.

First-Hand Knowledge

We have learned volumes about COVID-19. Our experience and the knowledge we've gained can help your business prepare for and prevent the worst. Whether you need general COVID-19 education, safety officer training, on-site consultations or tailored testing strategies, we offer consulting services to suit your needs.

Prevention and Treatments

We're also leading the way in COVID-19 research, with more than 100 projects underway, including clinical trials that address the entire spectrum of COVID-19 disease from prevention to treatment. Our recent grants include \$10 million from the National Institutes of Health to study long-term impacts of COVID-19 on first responders, health care workers and the general public, as well as a \$5 million NIH grant to rapidly implement COVID-19 testing strategies in populations disproportionately affected by the pandemic.

Testing

Our insight into the vast public health challenges of COVID-19 makes us a trusted source of help. As the pandemic struck the United States, we joined Battelle in developing a highly sensitive diagnostic test for COVID-19 that allows for a faster turnaround time on test results. We're the COVID-19 reference lab for the Ohio Department of Health, and we've processed well over 230,000 of the state's COVID-19 tests while expanding testing across Ohio by distributing hundreds of thousands of testing kits.

About The Ohio State University Wexner Medical Center

One of the nation's leading academic health centers, The Ohio State University Wexner Medical Center offers health care services in virtually every specialty and subspecialty in medicine. U.S. News & World Report has recognized us in its list of America's "Best Hospitals" ranking, based on quality, outcomes and reputation, for 28 consecutive years. Thousands of patients come to us each month for treatments and services they can't find anywhere else. Providing access to health care information is central to our research, education and patient care mission.
