Highlights of the Ohio State Neurological Institute’s Efforts

The Ohio State Neurological Institute combines all our neuroscience-related specialties into a single, integrated program to rapidly unlock the mysteries of the brain and pioneer translational research, innovative technology and novel therapies on every neurological front.

- Alzheimer’s Disease Research Center
- Gene Therapy
- Drug Clinical Trials
- Biomarker Research
- Brain Bank
- AI Identification of Cognitive Deterioration

- Focused Ultrasound Research/Trial
- Detox Program—Bridge Device
- 30-day Inpatient Residential Program
- Alcohol Addiction Studies
- Infant Fetal Alcohol Syndrome Studies

- Brain Imaging
- Transcranial Magnetic Stimulation (TMS)
- Ketamine Research/Trial
- Cognitive Behavioral Therapy (CBT) With Mindfulness

- Anti-Epileptic Drug Research/Trials
- Sudden Unexpected Death Research
- EMU—Epilepsy Monitoring Unit
- Epilepsy Pregnancy Clinic
- Stereo EEG Monitoring
- Epilepsy Surgery

- Center of Excellence
- Gene Therapy Trials

- Maternal and Fetal Stress
- Post-partum and Stress
- Moms2B Psychiatric Support
