

# Trauma, Critical Care and Burn

## Generosity in Action

### Delivering the Highest-Quality Care

When it comes to critical illnesses, traumatic injuries and burns, timely, compassionate and expert treatment matters to patients and their families. Formed in 2006, Ohio State's Division of Trauma, Critical Care and Burn delivers the highest-quality care for those who are critically ill and injured.

### Unparalleled Surgical Expertise

Traumatic injuries can sometimes lead to amputation, limb reconstruction or restoration. Your philanthropic support for surgical experts such as Jason Souza, MD, empowers them to use leading-edge technologies to help patients — including military veterans and active service members — who are facing life-changing injuries.

### A Mark of Distinction

Led by Nicole Bernal, MD, the American Electric Power Foundation Chair in Burn Care, Ohio State's Comprehensive Burn Center is the only adult ABA-verified Burn Center in central Ohio. The center has helped to provide burn garments for patients as well as educational opportunities for our specialists.

# 2,300+

procedures are performed annually

# 37

years as a certified Level 1 trauma center

# 2,700+

trauma patients are treated here each year
